

elements custom upholstery

DL & S is an upholstery manufacturer, based in High Point, North Carolina. They offer trendy, fashion forward, higher end designs at an affordable price. All pieces are made with wood frames with foam padding over all sides of the frame. The foam is standard weight and density, common to the furniture industry. Many pieces are very tightly upholstered, with a rather hard foam cushion. This is necessary for the design being created. All pieces can be special ordered in any of the fabrics available, at the same price.

Please allow 8-12 weeks for all special orders
