

elements leather upholstery

Leather is very unique. No two hides are ever the same; they all have different patterns. Leather regulates humidity and therefore never feels hot and will not become musty. Leather repels liquids and oils that most other materials absorb. This makes it easy to clean and maintain your leather. Soil or grease spots due to normal use may be cleaned with a very soft pencil or nubuck eraser, a cotton ball soaked in milk or a very mild soap. Do not use solvents or alcohol-based solutions on leather as it may cause discoloration. It also has the ability to stretch and return to its original shape. The frame is constructed out of kiln-dried hardwood and is secured at the stress points with corner blocks, glue and staples. Polyester/nylon suspension straps are secured to the frame, comprising the back and seat supports. All of these surfaces are covered in polyurethane foam. The seat cushions are made of dual density foam covered with woven Dacron.
