

# elements custom upholstery

Tivoli furniture is made by Carlton Manufacturing Co. in Elkhart, Indiana. Construction on all pieces is similar, in that they all use sinuous springs, with hardwood frames. Reflex foam is used on most seating surfaces, to give an upper layer of very resilient, memory foam. All sleeper sofas feature innerspring mattresses with a 299-coil count. The fabric range available is extensive, ranging from basic nylons to trendy cotton/linen washed looks to velvet. Tivoli will not upholster sofas, chairs, etc. with your own fabric.

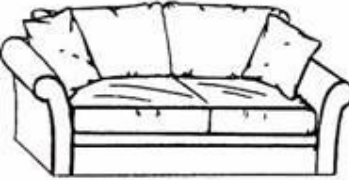

**Please allow 6-12 weeks for all special orders.**

## UPHOLSTERY CARE

Upholstered furniture can look its best when properly cared for on a regular basis. To obtain longer wear and comfort of your upholstery, vacuum and hand fluff the cushions. If they are reversible, turn them over and rotate the positions of each cushion once a week. Also, avoid placing the piece in direct sunlight, since this will cause any fabric to fade.

### General Precautions

- Do not allow stains to set.
- Pre-test the fabric for fading and shrinkage.
- Do not soak a fabric when cleaning it.
- Use clean, absorbent soft cloths when removing a stain.
- Work from the edge of the stain towards the center to keep from spreading the stain.
- Blot the stain and avoid harsh rubbing.
- Dust the wet area with pure talcum powder to absorb moisture, then use a fan or hair dryer set at cool to speed up the drying process.

### Cleaning Codes

All fabrics have a cleaning code listed on the individual swatch. Use codes as a guideline when considering a spot removal technique.

### \*Cleaning and repair techniques are performed at the customer's own risk.

<b>W</b>	Water based cleaning agents or foam may be used for cleaning. Cleaning by a professional furniture service is recommended.
<b>S</b>	Only mild, pure, water free dry cleaning solvents may be used for cleaning this fabric. Cleaning by a professional furniture services is recommended.
<b>W-S</b>	Water based cleaning agents and foam may be used for cleaning. Mild, water free solvents may also clean this fabric. Cleaning by a professional furniture services is recommended
<b>X</b>	This fabric should be vacuumed or brushed lightly to remove soil. <b>WARNING:</b> Do not use foam, or liquid cleaning agents of any type.

The tighter the weave, the longer the wear. Hold it up to the light. Can you see through it? Generally, people pick a blended fabric with some natural and some man-made fibers to benefit from qualities of each group. Patterns hide spots better than solid colors. Generally big bold patterns look best on large pieces, small patterns on small pieces. You can mix patterns providing you use common colors and mix small patterns with large. For example: a side chair in a small blue & cream floral mixes well with a sofa in a large blue & cream check (of course-this is subjective-go with your own tastes and preferences.)

## UPHOLSTERY FABRIC SELECTION

### So Many Fibers – So Little Time

With many of the possible combinations of fibers in a given piece of fabric, it can be very confusing to consumers trying to select a blend, which best suits, their needs. There are two groups of fibers; natural & man-made. Man-made fibers are produced either form cellulose or various combinations of carbon, hydrogen, nitrogen, and oxygen. Here are the basic characteristics of the fibers you are likely to run into during your search for the ideal fabric.

### Natural Fibers

#### **SILK**

- Strongest natural fiber
- Beautiful with good drape ability
- Spots easily
- Costly

#### **COTTON**

- Easy to clean, but easy to soil.
- Wrinkles easily.
- Fairly wear resistant
- Highly affected by sunlight (Can fade, yellow & lose strength)

#### **WOOL**

- Durable and resilient
- Tends to attract dust & dirt

### Man-Made Fibers

(Below is a list of the more common man-made fibers. Many others exist.)

#### **RAYON**

- Can resemble many different fabrics
- Durable, resists sunlight & wear
- Less resistant to oil, grease & mildew

#### **ACRYLIC**

- Soft
- Resists fading from sunlight
- Resists stretching
- Soil & oil resistant
- Not as strong as nylon

#### **OLEFIN**

- Softer than nylon
- Repels liquid
- Strong
- Limited color choices due to lack of dye acceptance.

#### **NYLON**

- Very strong
- Soil resistant
- Not very soft

#### **POLYESTER**

- Easy to clean
- Resists sunlight & wear
- Not as soil resistant as most man-made material
- Tends to pill
